3. Finding: Non-Compliant

Regulation: Chapter 7. Child Care Center
Section 2. Capacity/Supervision Requirements.

(a) The facility, for 16 children or more, shall not be located in any person's residence. The licenser shall determine facility capacity based on individual room capacity for all rooms used by children. This room capacity shall be displayed in each room and never be exceeded. The licensed facility capacity shall never be exceeded.

(i) The children counted in the capacity include all children present to include school age children and children related to staff.

Allegation: Reporter alleges that since the facility has moved to its current location, the infant room often has 4 children in the room and the toddler room often has 14 children, both exceeding the allowed maximum capacities.

Explanation of Findings: Evidence supports a finding of non-compliance. Based on the information collected during the investigation it shows that during meal times, the facility has 12 children in the preschool room which only allows for 11 children.

Action Required: The facility states that they are alternating children between the toddler room and the preschool room for meal times. Please alternate the lunch schedule to allow for only 11 children in the preschool eating area at any a time. If your numbers do not allow for this you may be able to receive a variance approval to allow for this space to exceed capacity during meal times only. As was discussed with the director, they will add a category to their attendance to show meal times for children. Please submit a detailed corrective action plan to the licensing office showing how you will ensure that the capacity of the room will be maintained and not exceeded.

6. Finding: Non-Compliant

Regulation: Chapter 4. General Requirements
Section 2. Capacity/Supervision Requirements.

(b) Staff:child ratios and supervision requirements as described in this chapter shall be maintained at all times.

Allegation: Reporter alleges that on 02/20/2024, as well as on other days in February 2024, that 1 staff has been alone with 8- 2 year olds, 1- 1 year old, and 1 preschooler, while a second staff member, M.R. was logged into the classroom but not in the room or attending to the children from the room/ group.

Explanation of Findings: Evidence supports a finding of non-compliance. Per attendance sheets and provider statements, the investigation shows that one staff is being left with too many children.

Action Required: If staff are checked into a room and counting in staff/child ratios they must be in that room and actively attending to children. When staff who are working in the facility, cleaning, kitchen etc., and not attending to children, they should not be checked into a classroom. Please submit a corrective action plan to the licensing office detailing how you will ensure that staff/child ratios are met at all times and that attendance reflects only staff who are in the room and attending to children.
