#### Comments/TA Provided:

Guillermina was present with 8 children ages 3 to 4 years. Snack time was finishing up children were transitioned to free play. Good supervision and classroom management. Bright Wheel app is used for attendance. Children are checked in and out by director. Two sessions of preschool, hours updated in the data base. Children were transitioned to tables for preschool activity. Guillermina uses positive guidance and calming techniques to transition children to a quiet activity. Group has a lot of boys and can be a bit rowdy but Guillermina is skilled at using individual attention and managing children who are high energy. Great observations.
