Comments:		
<p>Received the application for recertification, renewal fee, variance request, out of state central registry application for Danielle. TA - strap down the pads that are in the pack and plays, this was corrected on site and shown how to strap down the corners for safety. Remeasured the room that is being used for the infants and toddlers that are in care to ensure that proper space is available. The pack and plays are currently set up in the room which requires for the room to be measured at 50 square feet per child rather than 35 square feet per child. If the facility chooses to break down the pack and plays every day before and after nap time then the capacity and remove the door and only put up a baby gate then the capacity of the room could allow for a total of three infants and toddlers but for now the capacity only allows for 2 children. TA - the pack and plays will need to be spaced at least 3 feet apart to ensure proper air flow during nap time. TA - working on improvements and to make the playspace in the backyard more usable for the children. The facility currently does water days on Friday, and they are thinking about getting some new equipment and putting in resilient surfacing but will contact child care licensing before they make these changes.</p>		

130. Child Records Notes

There are a total of 14 children enrolled at the facility at the time of the visit and children's records are updated at the time of the renewal. TA - to update the child records because some of the records that were reviewed at the time of the visit did not have updated signed and dated forms. Child records are all compliant at the time of the visit.

131. Staff/Volunteer Record Notes

Reviewed staff records for Haylie, McKenzie, Alyssa, and Danielle at the time of the visit to ensure compliance with physical files and staff qualifications. Danielle is working as staff at the time of the visit without her out of state central registry being completed or having a variance on file for these qualifications. McKenzie is still working supervised under a variance approval to allow for her to be considered as staff while awaiting her out of state central registry results to be completed. The facility is working on completing training and licenser will follow up with what training is still needed once a staff summary is received from the provider.

132. Staff Child Ratios and Supervision

There are a total of 8 children in attendance in the living room with one staff person at the time of the visit, Alyssa (5 - 3 years old, 2 - 5 years old, 1 - 6 years old). There are two children in attendance in the infant/toddler room at the time of the visit with 1 staff person, Danielle (1 - infant, 1 - 1 years old). Dani is working in the infant/toddler room by herself at the time of the visit. Attendance records show that there are only 8 children signed in at the time of the visit but the provider was able to updated the attendance record immediately at the time of the visit once she noticed that two siblings were not yet signed in.
