Facility Type:  FCCH  FCCC  CCC

Comments/TA Provided:

This virtual visit is intended for licensing to ensure supervision of the multiple approved child care space within the facility in order for the facility to complete change request to increase capacity from 8 to 15, and change the facility type of an Family Child Care Home to that of a Family Child Care Center. There are 5 children in attendance at the time of the visit with one staff person Latish ( 1 - infant, 2 - 1 years old, 2 - 3 years old). The facility is set up in a way that the open floor plan allows for direct supervision of all children while in the living room and kitchen area. Discussed what supervision for children will look like when/if any children are playing in the bedroom because children 3 years old and younger will need to be directly supervised at all times, however, the 4/5 year old children or school age children can play in the adjacent space as long as they are within sight and sound of the staff person. Discussed what the napping room can look like by allowing one staff person to work on something else in the facility as long as all children are napping at the same time, but they can not leave the facility, and they must return to the room as staff when/if any children are awake. Discussed how child to staff ratios will work and explained that in order to take more than 3 infants a staff person needs to be certified with the infant toddler credential.
