Comments/TA Provided:

Tracy present with 9 children, ages: 1-infant, 2- 1yr, 4-3yr and 2-4yrs olds. TA done for changing station closer to children in the main area. Using the restroom is too far out of supervision of the children. Discussion with Tracy settled on a plan to take all children under three to the restroom area with she is busy changing diapers, Busy day but Tracy pays attention to the needs to the children. Water bottles were readily available to the children. Warm day and children had access to fluids.
