Comments/TA Provided:

Sheri was present with 6 children ages 4-5. Children were transitioning from outside time to circle time with an organized activity. Turtle stacking, and truffela trees, abuilding patterning and sorting activity. Sheri is very good at explaining the expectations of the activity and offering choices. She is skilled at supporting the children to express themselves while guiding them through the preschool objectives of the activities. Facility is well set up and offers a wide variety of preschool experiences for the children. Great observations!
