Comments/TA Provided:

10 children present with director Crystal Myers. Ages 4 and 5 years. Children were finishing up snack time. Transitioned to a bear hunt through the building to the playground. Playground has pea gravel as a resilient surface material All equipment in good shape and age appropriate for the preschool age children. Due to Covid-19 concerns two children at a time are going to the library to select books. Discussed with Crystal the need to have fully vetted staff directly supervising the children. Met with school administrator and secretary and discussed possible ways to use the library and maintain the preschool staff supervision. Variance might be a possibility or maybe the librarian can bring books to the classroom. Follow up on this issue will be done with Crystal Myers.
