Comments/TA Provided:

Two classes in attendance this day. The Purple room has 8 children present with Molly. The orange room has 9 children present with Mareta and Lance. Both classes are working on cutting today. Restrooms were checked. Staff records are current. Molly and Mareta's CPR/FA expire in November. WY C.R.s expire in October, submit those soon so you have current forms on file. Arrivals are staggered, temps are checked, hands are washed before the kids go to the classroom. Restroom breaks are usually done with one of the staff as floater. Discussed staff records for new staff. Molly has background checks and needs a TB assessment filled out on her new staff. The staff needs training before unsupervised. Discussed updating WY C.R.s. The playground was checked. TA: Surfacing material needs to be redistributed to restore depth under the swings.
