Comments/TA Provided:

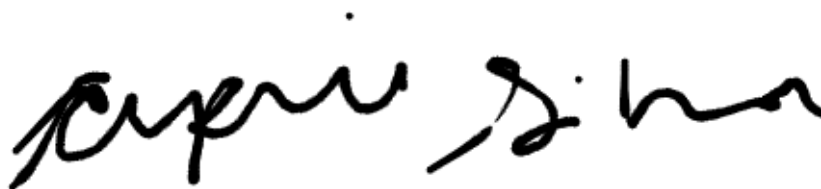

Unannounced visit done. Checked ratios and supervision. 6 classrooms all ratios are compliant. Recommend a convex mirror in the Pre-K room because of the L shaped design of the room. Checked the play yard. The recent snow storm took down the shade structure on the toddler playground. The structure will be repaired. Discussed use zones for the play structure on big playground. 4' 8" from the side of the big blue slide to the edge of the surfacing. 4' 8" from the bottom of the sliding pole, 4' 5" from the climbing wall, 4' from the side of the steps. The Licensor will follow up to see if a variance is needed. Discussed having a qualified Assistant Director on site anytime the Director is absent.
