Comments/TA Provided:

An unannounced visit to monitor infant sleeping room and supervision. There is an infant sleeping in the bedroom area, the door is open and the blackout curtains are gone allowing enough light to see the coloring and breathing of the child. There are 5 children present at the time of the visit. The children are napping. Discussed supervision and to make sure she is checking on the children that are napping every few minutes. Discussed options to help with helping to keep the doors open, such as pool noodles, etc. Things are going good, right now she is not enrolling new children due to the virus as well as she is not sure how many children will come back when school returns. There are no new household members or staff. Please call me with any questions.
