Comments/TA Provided:

Present director Kristina Study with two classroom staff and two therapists with 9 children age range 3-4 present. Ratios and supervision was observed and found complaint. Licenser observed staff on the playground with children and departure of children to parents. Playground evaluation conducted. Pea gravel resilient surface maintenance is needed as follows. End of sides, 9 inches of uncompressed gravel 4 feet out form the end of the slide and 6 feet out on each side of the slide. Under the swings, 9 inches of pea gravel 16 feet out from pivot point of the swings both front and back use zones. Tire swing needs to be replace and is not in use until replace, resilient surface is 6 feet out in diameter from the outer edge of the tire. Rake up gravel to meet the edge of the sidewalk in spots the gravel has compacted so avoid tipping hazard with trike riding. Kitchen area was inspected for use for snack time. Compliance needed as follows: place child proof locks on drawers with sharps, or plastic sacks. Send written notice to licenser when locks are installed. Director training was completed with new director Kristina Study. No new staff or updates for staff requirements at this visit.
