

FACILITY VISIT

Facility Name: World of Wonder

Date: 11/09/2021

Time: 09:30

Provider: _____

Certificate #: 002438

Phone: 307-632-8299

Address: 3406 Holmes Street

City: Cheyenne

Facility Type: ___ FCCH ___ FCCC X CCC

Comments/TA Provided:

This visit was conducted to review the conclusions/CCL-305 regarding CPL: 5162. Jennifer shared a new updated attendance form that was approved. She has also made an outdoor checklist and has updated policies and procedures regarding attendance/supervision. Those forms will be shared shortly. She has purchased walkie talkies so that staff are able to ask for help quickly if needed. She said it was working well. had Jen sign the CCL-300 for 10/21/2022. Provided the Statement of allegations for CPL-5177. These allegations resulted from the previous allegation. There were room capacities up in some of the rooms and the rest are being re posted as they may have fallen off the wall recently and the frames broke. We remeasured all of the rooms as the previous initial inspection was not available. Jen is not over room capacity. All rooms were in ratio with two staff. Jen stated that this is the normal routine. If there is a time that there may be more children than acceptable, she adds a teacher or moves children around. She looks at room capacity and the ages when determining this. The following measurements were taken. The original overall capacity is 91. The school aged room could house enough children to have a capacity of 101. This is not needed at this time. The second number provided is what she had thought it was previously. This may be due to the way licensing used to round numbers up many years ago. 4 yr old room $35.5 \times 224.5 (-9) = 860.75 / 35 = 24$ 2 yr old room $25.5 \times 15.5 (-9) = 379.75 = 10/11$ Combo room 2-3 $20.25 \times 29.25 (-9) = 583.31 - (42/3 \times 6/5) = 555.17 / 35 = 15/16$ Infant room $20.5 \times 20.25 = 415.12$ Divided by 50 = 8 Divided by 35 = 11 1 yr old room $19.5 \times 20.25 = 394.87 / 35 = 11$ School age/multi purpose $51.5 \times 19 = 978.5 = 28$ This gives an over all capacity of 99 or 101. Jen chose to leave it at 91 at this time. Thank you Jen for your patience in all of this.
